

To whom it may concern,
Our family listens to and financially supports the radio station, K-LOVE heard in our area on 88.7 and 92.9. I understand that you're considering changing regulations that would affect the broadcasting of FM translator services. This station is very important to my family and the community as a whole. It provides us with a station that is appropriate and safe for all ages. It is important to me also to know that the messages and songs we enjoy are being enjoyed by others of like belief across the country and around the world on the internet. It also provides free notices for upcoming non-profit events in our community. Another invaluable service available to listeners is the counseling hotline which handles calls of serious life matters. Many families including ours, receive encouragement and support for raising our families
